

MediStreams Exhibits at Leading Healthcare Tradeshows

MediStreams - One healthcare platform handles all payments - paper and electronic.

ROSWELL, Ga. ([PRWEB](#)) September 19, 2018 -- MediStreams, a Revenue Cycle Management (RCM) company hits the road this fall presenting at HBMA 2018 in Charlotte, NC, Medtrade Expo in Atlanta, GA and again at AAHAM 2018 in Bonita Springs, FL. MediStreams looks forward to interacting and sharing with billing teams how their remittance automation services remove the daily challenges associated with processing and posting payments; as well as handling correspondence.

Over the past ten years MediStreams has grown to be a leader in the industry. They integrate with most of the industry leading patient accounting and practice management systems to deliver payment-posting files that meet the distinct requirements of physician groups, hospitals, labs, billing companies and clinics.

MediStreams services surpass their competitors with exclusive configuration tools to aid clients with splits of 835 files to multiple Practice Management or Healthcare Information Systems. During implementation EOB adjustments and payer splits can be set using technology rules and logic to deliver consistent output every time. MediStreams is very flexible and responsive. They give a seamless and stable implementation for a scalable environment to allow customers to support high production and quality standards.

MediStreams customers affirm that the automated services improve their revenue cycle team's ability to manage, automate and accurately capture all insurance and patient payments. Their customers acknowledge the benefit of growth without more staff, elimination of overtime, reduction of denials and improved accuracy and speed of posting payments. Customers have reported a 70% to 98.5% improvement in posting accuracy.

The comprehensive suite of services gives cost savings to meet the current and future growth for providers. Fast and easy access to a ten-year, online archive with all images and data. No more paper. Unlimited users. Customized files for auto-posting, match funded ERAs for reconciliation and an online tool to send all inbound correspondence for indexing, routing, and research. The solution interacts directly with a provider's bank, clearinghouse and lockbox for daily image and document feeds to process.

Visit with MediStreams now or at one of the upcoming shows to learn why these and many others are taking the leap to automated solutions provided by MediStreams:

- The Second largest physician-owned dermatology practice in the U.S.
- The largest radiology group in the U.S.
- A rapid expanding multi-state dermatology group.
- A multi-specialty medical group that includes more than 1,200 physicians.
- One of the oldest and largest cardiovascular groups with over 70 physicians.
- A large healthcare organization with a teaching hospital system, specialty and community hospitals, physician practices and outpatient care centers across their state.
