

MediStreams Strengthens Solutions for Channel Partners

Branded Solutions for Channel Partners

ROSWELL, Ga. ([PRWEB](#)) March 28, 2020 -- MediStreams, a growing leader in the HRCM market offers an end-to-end payment processing solution. The MediStreams' proprietary and innovative platform integrates into the provider's A/R workflow. It ingests all payments; both commercial and patient payments plus correspondence to produce customized outputs for downstream processes. The MediStreams' client mix includes national health systems, hospitals, clinics, labs, and physician's groups for various Orthopedic, Radiology, DME, Pathology, Dermatology, and other entities. Each has their unique set of billing challenges. MediStreams' diverse product mix, coupled with their priority Configuration Engine, positions them to offer full customization for each client. MediStreams transforms ideas into results with a consultative approach.

MediStreams is celebrating their 10th year of service delivery to providers with almost zero churn in their portfolio of clients. Their product development is relationship driven. New services at MediStreams are purpose-built to meet the needs of clients and reseller partners. They seamlessly intertwine their automated services into the existing transaction flow between banks, lockboxes and practice management or other receivable systems. In this way, MediStreams becomes an extension to the offerings of an elite network of banks, clearinghouses, consultants, and practice management system partners. The MediStreams solutions often become a valuable add on to an existing branded service offering. The services encompass all forms of payment, Medical Lockbox, Correspondence Workflow, ERA Normalization, Paper EOB Conversion, Patient Payments, Credit Card Processing, and Financial Reconciliation.

The HIPAA compliant cloud platform, with custom outputs, speeds up the posting, research, reconciling and follow-up of payment transactions. MediStreams is transformational to the revenue cycle yielding gains in efficiency and accuracy while lowering the cost of getting paid.
